PORTFOLIO PERFORMANCE

MARKET UPDATE

JCI continued its strong performance in July, closing with a decent +0.5% monthly gain, cheering Bank Indonesia's (BI) decision to finally cut its 7-Days Reverse Repo Rate by 25bps to 5.75%. BI also highlighted the possibility to take further accommodative policy measure in the short term. Rupiah strengthened by 0.75% MoM to Rp14,022/USD. A slight pullback in the market however was seen approaching end-of-month in response to the 100% free-float adjusted stock weighting into several major indexes, namely LQ45 and IDX30, affecting movement of selected big cap names. Foreign investors were recorded as net seller at end of the month totaling Rp257bn (USD21mn) on profit-taking action following the rally; while the upcoming China A-Shares up-weight into the MSCI index in August also caused an early concern. Jakarta Basic Industry and Chemicals booked as the best performing index in Jul-19 with petrochemical related companies, namely TPIA (+26.3%) and BRPT (+20.9%) were the main driver of the rally. Cement sectors also saw a strong performance on expectation of better pricing environment. Top 5 drivers for the index: TPIA (+26.3%), BRPT (+20.9%), CPIN (+13.6%), INTP (+12.4%), SMGR (+11.2%). In the meantime, continuing weak coal prices brought Jakarta Mining Index as the worst performing index for the month. This came following China coal inventory which continued seeing an uptrend, outpacing overall demand, despite of peak demand season. The prolonging US-China trade war issue also didn't help sentiment, and rather brought other mining prices, such as base metal (i.e. Nickel and Aluminum) continued to be under pressure. Top 5 drivers for the index: BYAN (-13.3%), ADRO (-6.6%), FIRE (-47.0%), PTBA (-7.4%), INCO (-2.9%).
