MARKET UPDATE

IBPA Sukuk Index (SBIX) increased 0.32% in March. Indonesia 10years sharia government bond yield (PBS025) decreased by 1bps to 6.68%. In March 2024, the US bond yield curve remained inverted, albeit less steeply, following signals from The Fed indicating potential rate cuts up to three times within the year. This development has fostered a positive sentiment in the bond market, as ongoing speculation about rate cuts by the Fed could create an opportunity for investors, leading to further declines in bond yields. Although US inflation may still encounter challenges, it appears to be on a downward trend, which indicates progress. Meanwhile, discussions within the domestic market revolve around the government's proposal to increase the Value Added Tax (VAT or PPN) by 1%, from 11% to 12% in the upcoming year. While this could potentially push domestic inflation higher, it is expected to remain within the range of 3% to 4%, ensuring that real yields remain in positive territory. The yield spread between US Treasury and IndoGB bonds is anticipated to remain at the current level of approximately 250 basis points, reflecting the new normal. In the event of any fluctuations in US economic data causing corrections in bond yields. Based on DMO bond flow data as of March 28, Foreign ownership recorded at 1.29% of the outstanding and outflow of Rp2.78trn YTD.
