Oct-23	: -7.66%	Apr-24	: -6.34%

## Annual Performance :

N/A

## MARKET UPDATE

The JCI closed the month of Apr 24 at -0.75%, lagging global and regional indices to be one of the worst performing markets as BI delivered a surprise rate hike to support the IDR. The IDX30 and LQ45 showed a steeper decline of -6.09% and -6.01% respectively. The narrower indices were dragged lower by the selloff in heavy weight big cap names while index heavy weights with low free float such as BREN, TPIA, and AMMN supported the broader JCI. Despite the relatively sluggish economic growth while inflation remains well under control, BI delivered a surprise rate hike as the USD/IDR breached 16,000 in the offshore market over the Lebaran holiday. This move affirms BI's stance of maintaining exchange rate stability over economic growth. BI may continue further tightening its monetary policy through its policy rate and open market operation to support the IDR, thus further stifling economic growth. Although Indonesia continues to maintain a strong long term economic growth potential, caution may be warranted in the short term as neither fiscal nor monetary policy are supportive of economic growth. Further, foreign outflow from domestic equities may continue as investors continue to digest the weak first quarter earnings and concerns revolving around the major SOE banks, resulting in pressure on the equity market. Monthly outperformer relative to the JCI in Apr24 was the IDX Sector Energy (+5.8% vs JCI), IDX Sector Basic Materials (+5.3%), IDX Sector Infrastructures (+4.7%), and IDX Sector Healthcare (+4.2%). Meanwhile, the laggards relative to the JCI were the IDX Transportation & Logistic (-8.7%), IDX Sector Consumer Cyclical (-6.1%), IDX Sector Financials (-5.5%), IDX Sector Technology (-5.4%), IDX Properties & Real Estate (-4.9%), IDX Consumer Non-Cyclical (-3.5%), and IDX Sector Industrial (-1.6%). Bank Indonesia (BI) has taken a surprising step by increasing its benchmark interest rate by 25 basis points to a historic high of 6.25%, in response to the recent depreciation of the Rupiah. Governor Perry Warjiyo characterized this unexpected move as a measure to fortify the stability of the Rupiah against escalating global risks, and to ensure that inflation remains within the target range of 2.5% plus or minus 1% for 2024, which could exacerbate due to imported inflation in food and fuel. In April 2024, Rupiah was depreciated 2.50% to 16,249.
