MARKET UPDATE

JCI closed the month of July 2024 at +2.72% MoM, outperforming most global markets especially developed markets as the weaker dollar and easing cycle will favor emerging Asia over developed countries. The IDX30 and LQ45 indices generally moved in line with the broader index with gains of 2.66% and 2.93% respectively. AMMN was the best performer during July 2024, which led to the outperformance of LQ45 against JCI and IDX30 due to AMMN's larger weighting in LQ45 while not included in IDX30. The rising confidence of foreign investors are driven by rising expectation of Fed rate cut in September, more stable IDR, and largely strong earnings momentum from the large cap names. In July 2024, BI middle rate was appreciated 0.62% to 16,320/USD. Investors' concern on fiscal policies has somewhat subsided as well as recently with Thomas Djiwandono, which is the next elect Prabowo's nephew and economic transition team, was appointed as the deputy minister of Ministry of Finance under Sri Mulyani and Jokowi's cabinet. This inauguration is believed to provide certainty over a smooth and prudent fiscal transition into the new presidential office under Prabowo. Asian markets recorded mixed results in July 2024. In China, consensus now predicts the 5% GDP growth target may not be met this year due to sluggish growth at the end of Q2. Despite healthy industrial production (up 5.3% YoY) but falling retail sales. The People's Bank of China (PBoC) cut some of its policy rates to support growth. On the fiscal policy front, the authorities reaffirmed pro-growth commitment to achieve GDP target this year. In Japan, following a policy rate hike and hawkish comments by Bank of Japan (BoJ) Governor Ueda, the Yen rose sharply on 31 July, reaching its highest level since March. At the same time, weak US jobs data and rate cut expectations have put downward pressure on the US dollar, this led to a massively eased USD/JPY carry trade. Chip manufacturers in South Korea weakened during the sell-off in technology stocks. Major surprises in the US presidential election campaign and the timing of interest rate cuts by the US central bank also weakened investor sentiment in the month. Equity markets in India, Indonesia and Singapore made modest gains in the month. Healthcare was the strongest sector this month, while semiconductor manufacturers experienced the sharpest price declines. Asian market performance in July 2024 was as follows: HK Hang Seng (-2.1%), Nikkei (-1.2%), Shanghai Index (-1.0%), Korea KOSPI (-1.0%), Singapore STI (+3.7%), India Sensex (+3.4%), Thailand SET (+1.5%), Malaysia KLCI (+2.2%), Indonesia JCI (+2.7%), and Philippines PSEI (+3.2%).
