MARKET UPDATE

During July 2024, the Indonesian government bond market managed to record positive performance amid global sentiment. Domestically, several economic data showed resilient and stable conditions amid global volatility. Economic growth in Q2-2024 grew by 5.05% YoY (vs 5.11% in Q1) driven by consumption and investment. Inflation in July 2024 continued to decline to -0.18% MoM/2.13% YoY (vs. -0.08% MoM/2.51% YoY in June), the second consecutive month of deflation due to normalization of domestic commodity prices, indicating weak domestic demand. The trade balance in June 2024 remained in surplus at USD 2.39 billion despite a decline compared to previous months (vs USD 2.93 billion). Meanwhile, foreign exchange reserves in June 2024 increased to USD 140.2 billion (vs USD 139 billion in May) driven by an increase in tax and service revenues and global government bond issuance. On the fiscal side, the state budget deficit widened to -0.34% of GDP or IDR77.3 trillion (vs. -0.10% of GDP or IDR 21.8 trillion in the previous month), amid low state revenue and high state expenditure especially for subsidies and compensation. Amid global volatility, Bank Indonesia decided to maintain the BI rate at 6.25% at its July 2024 meeting. BI seeks to maintain Rupiah exchange rate stability amid the risk of global pressures as well as pre-emptive and forward looking efforts to maintain inflation within BI's target. Foreign ownership in IndoGB was recorded at IDR 813.07 trillion or 14% of total bond ownership. Government bond ownership is still dominated by domestic institutions. Rupiah stabilized with +0.70% MoM appreciation and -5.60% YTD depreciation to 16,260 at the last trading session of the month. Overall, domestic bond market performance was solid amidst mixed global sentiment. The bond market performance was shown by INDOBeX Government Total Return index (INDOBeXG) which increased by +1.08 MoM and Government Sukuk index (IGSIX) which increased by +0.59% MoM. JCI closed the month of July 2024 at +2.72% MoM, outperforming most global markets especially developed markets as the weaker dollar and easing cycle will favour emerging Asia over developed countries. The IDX30 and LQ45 indices generally moved in line with the broader index with gains of 2.66% and 2.93% respectively. AMMN was the best performer during July 2024, which led to the outperformance of LQ45 against JCI and IDX30 due to AMMN's larger weighting in LQ45 while not included in IDX30. The rising confidence of foreign investors are driven by rising expectation of Fed rate cut in September, more stable IDR, and largely strong earnings momentum from the large cap names. In July 2024, BI middle rate was appreciated 0.62% to 16,320/USD. Investors' concern on fiscal policies has somewhat subsided as well as recently with Thomas Djiwandono, which is the next elect Prabowo's nephew and economic transition team, was appointed as the deputy minister of Ministry of Finance under Sri Mulyani and Jokowi's cabinet. This inauguration is believed to provide certainty over a smooth and prudent fiscal transition into the new presidential office under Prabowo.
