MARKET UPDATE

JCI closed the month of July 2024 at +2.72% MoM, outperforming most global markets especially developed markets as the weaker dollar and easing cycle will favor emerging Asia over developed countries. The IDX30 and LQ45 indices generally moved in line with the broader index with gains of 2.66% and 2.93% respectively. AMMN was the best performer during July 2024, which led to the outperformance of LQ45 against JCI and IDX30 due to AMMN's larger weighting in LQ45 while not included in IDX30. Domestically, several economic data showed resilient and stable conditions amidst global volatility. Economic growth in Q2-2024 grew by 5.05% YoY (vs 5.11% in Q1) driven by consumption and investment. Inflation in July 2024 continued to decline to -0.18% MoM/2.13% YoY (vs. -0.08% MoM/2.51% YoY in June), the second consecutive month of deflation due to normalization of domestic commodity prices, indicating weak domestic demand. The rising confidence of foreign investors are driven by rising expectation of Fed rate cut in September, more stable IDR, and largely strong earnings momentum from the large cap names. In July 2024, BI middle rate was appreciated 0.62% to 16,320/USD. Investors' concern on fiscal policies has somewhat subsided as well as recently with Thomas Djwandono, which is the next elect Prabowo's nephew and economic transition team, was appointed as the deputy minister of Ministry of Finance under Sri Mulyani and Jokowi's cabinet. This inauguration is believed to provide certainty over a smooth and prudent fiscal transition into the new presidential office under Prabowo.
