MARKET UPDATE

JCI closed the month of July 2024 at +2.72% MoM, outperforming most global markets especially developed markets as the weaker dollar and easing cycle will favor emerging Asia over developed countries. The IDX30 and LQ45 indices generally moved in line with the broader index with gains of 2.66% and 2.93% respectively. AMMN was the best performer during July 2024, which led to the outperformance of LQ45 against JCI and IDX30 due to AMMN's larger weighting in LQ45 while not included in IDX30. The rising confidence of foreign investors are driven by rising expectation of Fed rate cut in September, more stable IDR, and largely strong earnings momentum from the large cap names. In July 2024, BI middle rate was appreciated 0.62% to 16,320/USD. Investors' concern on fiscal policies has somewhat subsided as well as recently with Thomas Djiwandono, which is the next elect Prabowo's nephew and economic transition team, was appointed as the deputy minister of Ministry of Finance under Sri Mulyani and Jokowi's cabinet. This inauguration is believed to provide certainty over a smooth and prudent fiscal transition into the new presidential office under Prabowo. Eurozone market notched up a small advance in July amid gains for the healthcare, utilities, and real estate sectors. Some strong quarterly earnings and positive clinical readouts helped to support stocks in the healthcare sector. The information technology sector was affected by a rotation out of growth stocks and worries that the US might seek to impose further restrictions on what semiconductor equipment can be sold to China. Eurozone GDP growth was 0.3% QoQ in 2Q24, while Germany saw a -0.1% fall in GDP. Eurozone annual inflation for July was estimated at 2.6%, up from 2.5% in June. The European Central Bank (ECB) kept interest rates on hold at its last July meeting, as expected. ECB Governor Christine Lagarde said a decision on a possible cut in September was "wide open" and dependent on incoming data. The flash Eurozone purchasing managers' index (PMI) indicated that the Eurozone economy was near stagnation with a reading of 50.1, down from 50.9 in June. The Euro market was mostly higher during July 2024 with the FTSE 100 8,367.98 (+2.45%), Deutscher Aktien Index (DAX) 18,508.65 (+1.45%), Deutscher Aktien Index (DAX) 18,508.65 (+1.45%), and CAC 40 7,531.49 (+0.70%). The Bank of England also kept interest rates unchanged at 5.25%, effectively holding the same level for 10 months. Eurozone inflation hit 2.6% in July 2024, with core inflation at 2.9%, beating expectations and higher than 2.5% in June 2024. However, the market believes that a rate cut can still be expected in September 2024.
