### MARKET UPDATE

In the month of April, JCI posted a return of +3.93% MoM with foreign outflow of Rp21tn. Indonesian equity indices seemingly defy gravity as they made another hefty rebound in April despite the large foreign outflow, depreciating IDR, Trump's reciprocal tariff announcement, and relatively weak domestic macro sentiments. Domestic money inflow were the main support for the equity market given the undemanding valuation of JCI at below pandemic level while local institutional investors were sitting on ample of cash by the end of 1Q25. Blue chip names were on the rise on hopes for higher dividend payouts while consumer staples names were chased as safe haven post Trump tariff announcement. Meanwhile, gold proxies were the stars of the month as gold price rallied to almost USD3500/oz. DXY and USD/IDR movement started to decouple as despite the weaker USD, IDR also continued to depreciate due to domestic sentiments. 1Q25 corporate earnings results were relatively more in-line though still indicated weak growths.
