| -1.47% | 1.81% | 9.57% | 0.50% | -4.63% |

## MARKET UPDATE

In the month of July JCI recorded a +8.04% MoM, significantly outperforming the global market mainly driven by renewed interest in non-IDX30 names (conglomerate groups) following the new MSCI rule change for index inclusion. Foreign investors continue to become a net seller of Indonesian equities in July, with an outflow of USD43mn, bringing total YTD net equity outflow of USD2.0bn. With global market stabilized as trade tensions eased and Indonesia has secured 19% tariff deal with the US have lifted investors risk appetite during the month. Nonetheless, despite positive external development, from the domestic front, sentiment toward Indonesia continued to be weigh down by weak domestic economic conditions and soft purchasing power. These concerns further fuelled by soft 2Q25 earnings results, with aggregate revenue/net profit declined by -2%/-10% during the quarter. In July 2025, BI middle rate was depreciated 0.94% to 16,387/USD. In China, GDP growth came out at 5.2% year-on-year (after 5.4% in the first quarter). This was higher than expected but revealed a slight slowdown that was also confirmed in June's retail sales (+4.77% year-on-year, with a month-on-month contraction) and investment. The official PMI published by the National Bureau of Statistics revealed a decline in the manufacturing index (from 49.7 in June to 49.3 in July) with a drop in orders, including exports. Domestic demand continued to deteriorate, not only in the property sector, and signs of a slowdown in external demand are beginning to appear. However, insofar as GDP growth recorded in the first and second quarters was above the 5% target, the authorities are unlikely to rush announcing any new strong support for activity. The conclusions of the Politburo meeting focused on medium-term reforms rather than on possible short-term support measures. Asia market performance in July were as follows: HK Hang Seng (+2.9%), Nikkei (+1.4%), Shanghai Index (+3.7%), Korea KOSPI (+5.7%), Singapore STI (+5.3%), India Sensex (-2.9%), Thailand SET (+14.0%), Malaysia KLCI (-1.3%) and Philippines PSEI (-1.8%).
