MARKET UPDATE

In the month of July JCI recorded a +8.04% MoM, significantly outperforming the global market mainly driven by renewed interest in non-IDX30 names (conglomerate groups) following the new MSCI rule change for index inclusion. Foreign investors continue to become a net seller of Indonesian equities in July, with an outflow of USD43mn, bringing total YTD net equity outflow of USD2.0bn. With global market stabilized as trade tensions eased and Indonesia has secured 19% tariff deal with the US have lifted investors risk appetite during the month. Nonetheless, despite positive external development, from the domestic front, sentiment toward Indonesia continued to be weigh down by weak domestic economic conditions and soft purchasing power. These concerns further fuelled by soft 2Q25 earnings results, with aggregate revenue/net profit declined by -2%/-10% during the quarter.
