MARKET UPDATE

Indonesia headline inflation picked up to 2.4% YoY in July 2025 from 1.9% in June 2025, slightly above consensus' estimates of 2.3% due to higher food prices. On a monthly basis, prices increased by 0.3% MoM, up from 0.2% in June 2025. In contrast, core inflation edged down to 2.3% YoY in July 2025 from 2.4% in June 2025, against consensus' expectations of it remaining unchanged. Bank Indonesia (BI) cut its policy rate by 25bps to 5.25% in July 2025, resuming its easing cycle after only a one-month pause in June 2025. Note that the previous cuts in May and January 2025 were preceded by three-month pauses, so this marks a faster pace of easing. BI maintained a dovish tone, emphasizing the need to support economic growth. BI also stated that it will continue to assess room for further rate cuts, with timing and magnitude depending on global and domestic economic developments. In July 2025, BI middle rate was depreciated 0.94% to 16,387/USD.
