MARKET UPDATE

Indonesia's bond market responded positively when BI decided to cut BI rate by 25bps to 5.0% at August meeting, marking a 100bps total cut rate during 2025, to support growth. BI continues to provide further dovish signals, including the opportunity for further rate cuts and signals, while continuing to improve liquidity by purchasing government bonds and letting SRBI mature gradually. Another positive domestic sentiment came from the announcement of the 2026 state budget deficit target which is still manageable at -2.5% of GDP. However, the market remains worried about the aggressive revenue target amid declining revenue condition during the year. On the other hand, the market also responded positively to several release of economic data, including the release of Q2-25 GDP data which grew above expectations (5.1% YoY vs market expectations of 4.9% YoY), relatively stable inflation data (2.4% in Jul-25), trade balance which continued to record a surplus, and manageable current account deficit (-0.8% of GDP). The Government Sukuk index (IGSI) increased by 1.32% MoM and Indonesia benchmark series 13 years' sharia government bond yield (PBS034) decreased by 14.7bps to 6.57%. In August 2025, BI middle rate was appreciated 0.19% to 16,356/USD.
