MARKET UPDATE

Indonesia's bond market recorded positive performance in April 2026. The Government Sukuk index (IGSIX) increased by 0.40% MoM. Domestically, the market responded negatively to the result of the BI meeting in April 2026. Bank Indonesia (BI) maintained the benchmark interest rate in line with consensus, but with a hawkish policy tone. BI has also raised the SRBI interest rate in an effort to maintain the stability of IDR which had weakened, driven by the large maturity of forward instruments. BI emphasized that the increase in interest rates will only be done if the weakening of IDR continues sustainably and impacts to inflation. Fiscally, the government has started to implement massive efficiency policies in the face of rising oil prices, through cuts in the MBG budget and ministries budget. Those steps are expected to save IDR 152-161tn, which can be allocated for an additional energy subsidy of IDR 90-100tn to maintain fuel prices. In April 2026, BI middle rate was depreciated 1.91% to 17,324/USD.
