MARKET UPDATE

In the month of July 2026, JCI posted a return of +10.51%. The recovery was broad-based, with every sector ending the month in positive territory. The strong performance suggests risk appetite improved materially during the month after a difficult first half of the year, with investors becoming more willing to rotate into cyclical and economically sensitive sectors. Despite the sharp market rebound, earnings expectations remained somewhat mixed, with consensus 2026 earnings estimates revised lower by 1.5% MoM, bringing total downgrades for 2026 to 2.2% YTD. The market recovery was accompanied by a significant improvement in valuations. Forward valuation multiples expanded by approximately 8% during the month, reflecting stronger risk sentiment and a willingness among investors to re-price Indonesian equities after a prolonged correction.
