MARKET UPDATE

Indonesia's inflation moderated to 3.2% YoY in October, from 3.3% YoY in September, in line with expectations. On a monthly basis, inflation rose by 0.2%, compared with 0.3% previously. However, the inflation improvement was largely driven by gold-price inflation falling sharply by 10% from 27%. Excluding gold, inflation accelerated to 3.0% from 2.8%, indicating that underlying price pressures continued to build. Bank Indonesia (BI) kept its policy rate unchanged at 5.75%, in line with our expectation, although the market consensus was evenly divided. BI nevertheless raised the Deposit Facility rate by 25bps to 5.00%, narrowing its gap with the BI Rate to 75bps. This signals a tighter liquidity stance without resorting to a headline rate hike. BI maintained that the current policy setting remains sufficiently restrictive to support rupiah stability, despite the currency depreciating by 1.2% MoM. The monetary-policy tone remained broadly neutral, reflecting BI's effort to balance exchange-rate stability with continued support for economic growth. In October 2026, BI middle rate depreciated 0.72% to 18,128/USD.
